Replacement of the outdoor unit and Using of pairing-code-function

To do :

1. Disconnect the electricity from the door and the relay unit.

2. Switch the fingerprint-reader-unit.

3. Reconnect the electricity from the door and the relay unit.
   → *the red LED of the fingerprint-reader-unit flashs*

4. Do pairing by your IR remote control:
   OK   <pairing code>   OK

   OK_____OK
   → *The flashing of the red LED is ending after a few seconds*
   → *All LEDs should glowing*

   > **Easier variant of 4.**
   > Press the „Pairing"-button on the relay unit for 3 ~ 8 seconds.

5. Insert on IR remote control: auto-test
   0   OK
   → *the motorlock should start to work*
   Attention: **If the red LED of the *fingerprint-reader-unit flashs* again:**
   Please start from point 4 again.

6. Reprogram the device according to the latest manual
